

# KAROLINA ALMGREN - FÄRDAS

The Swedish saxophone player and composer Karolina Almgren's latest album "Färdas", which means to travel or to be on your way, is a reflection of the words different spectrums.

To be on the move, traveling to new places, meeting new people and getting inspired by what you see.

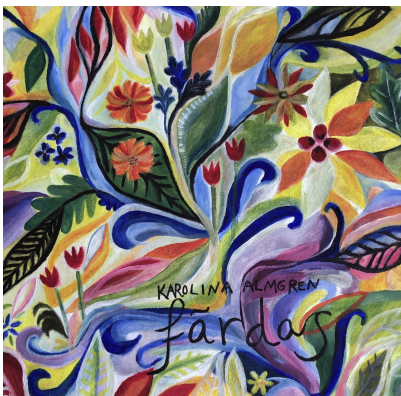

But also the mind traveling, constantly thinking about new dreams, goals and projects.

Composed as a reflection of the life you live as a musician.

Recorded in three different studios with a lot of different musicians it's a celebration to various instrumental settings, recording processes and of course the musicians unique sounds.

*"Färdas has enabled me to explore different approaches in composing, arranging and elaborate with different recording techniques.*

*But always with the main aim of writing music from my heart."*
